Contents of Volume 4

Number 1 January–March 1988

Special Issue:
Symposium on Molecular Electronics and Biocomputers (MEBC), held in Budapest, Hungary, 24–27 August 1987

Foreword *G. Biczó and P. Rajczy* 1

Opening Welcome 3

Molecular Optical Devices *R. S. Potember, R. C. Hoffman, S. H. Kim, K. R. Speck and K. A. Stetyick* 5

Selective Coordination Epitaxy of Metal Complexes *H. Tanino, K. Takahashi and T. Yao* 17

Polar Molecular Crystals: in Search of Effective Nonlinear Molecular Materials *A. Miniewicz, A. Samoć and J. Sworakowski* 25

Theory of Molecular Opto-Electronics: from the Molecule to the Crystal *R. W. Munn* 31

Optical Investigations of Conjugated Polymers *R. H. Friend* 37

Lateral Molecular Organization and Order in Monomolecular Layers *H. Möhwald* 47

Proton Supermobility: a Mechanism for Coherent Dynamic Computing *M. Conrad* 57

Asynchronous versus Synchronous Computation in the Nervous System and their Models *E. Lábos* 67

Number 2 April–June 1988

Theory of Conduction in Molecular Solids II—Application *B. Movaghar* 79

Orientation-controlled Immobilization of Protein Molecules on Thin Organic Films Deposited by the Plasma Technique *Y. Jimbo and M. Saito* 111

Polymer Electronic Devices *P. H. E. Meijer and A. van Roggen* 119

Molecular Switch: a Tight-binding Approach *C. Joachim* 125

Book Reviews 137

Forthcoming Meetings 140

Number 3 July–September 1988

Special Issue:
International Conference on Electronics of Organic Materials (ELORMA), held in Tashkent, USSR, 16–21 November 1987

Memory Effects in the Transport of a Quantum Particle in Organic Crystals *P. Reineker, K. Kassner and B. Kaiser* 141

Self-trapping in Solids *E. I. Rashba* **149**

Two-component Solitons in Quasi-one-dimensional Molecular Systems *A. S. Davydov* **155**

Polaron and Bipolaron Defects in Polymers: Polyaniline *A. J. Epstein and A. G. MacDiarmid* .. **161**

Resonant Raman Scattering Spectra of Undoped and Doped Polyacetylene *S. Lefrant, E. Mulazzi, E. Faulques and E. Perrin* **167**

Electronic Properties of $(DMET)_2X$ *K. Murata, K. Kikuchi, T. Takahashi, K. Kobayashi, Y. Honda, K. Saito, K. Kanoda, T. Tokiwa, H. Anzai, T. Ishiguro and I. Ikemoto* **173**

Topology and Spin Alignment in Model Compounds of Organic Ferro- and Ferri-magnets *K. Itoh, T. Takui, Y. Teki and T. Kinoshita* **181**

Excitonic Processes in Pyrene and α-Perylene Crystals *K. I. Mizuno and A. Matsui* **187**

A Weak Coupling Theory for La_2CuO_4: Ln_2 Parquet Approach *I. E. Dzyaloshinskii and V. M. Yakovenko* **193**

Forthcoming Meetings **199**

Number 4 October–December 1988

Metal–Insulator–Germanium Diodes Incorporating Molecular Multilayer Dielectrics *J. D. Shutt and S. E. Rickert* **201**

Methods of Characterization for Langmuir–Blodgett Films *M. Vandevyver and A. Barraud* **207**

The Temperature Threshold of Davydov's Solitons *M. Satarić, Z. Ivić, Z. Shemsedini and R. Žakula* **223**

Prediction of Patterns for the Regular Distribution of Soluted Guest Molecules in Liquid Crystalline Phospholipid Membranes *J. A. Virtanen, P. Somerharju and P. K. J. Kinnunen* **233**

Book Reviews **237**

Forthcoming Meetings **240**

Author Index **241**

Keyword Index **242**
